

Dear MLZ User,

we like to remind you to apply for beam time at the Heinz Maier-Leibnitz Zentrum (MLZ).

Next Proposal Deadline: March 27th, 2020

Please submit your application online within your personal account at our new User Office Online System GhOST

using the proposal round **“External round 27”**.

Please note!

If you had an account at our old User Office System, you have to create a new account, too. Your personal data have not been migrated!

The review of the proposals will take place on May 14th-15th, 2020. Results of the review will be available online about two weeks later.

To ensure the feasibility of the proposed experiment please contact the instrument scientist well in advance. Please find all detailed information in “Getting beam time”, at

mlz-garching.de/englisch/user-office/getting-beam-time

Financial Support

Please have a look at

mlz-garching.de/englisch/user-office/your-visit-at-mlz/home-again

Please check the eligibility conditions there!

Instruments at the MLZ

The following instruments are available for applications:

DIFFRACTION:

BIODIFF: diffractometer for large unit cells, cold source

HEIDI: single crystal diffractometer, hot source

MIRA: multipurpose instrument, cold source

POLI: polarized hot neutron diffractometer, hot source

RESI: single crystal diffractometer, thermal source

SPODI: high resolution powder diffractometer, thermal source

STRESS-SPEC: material science diffractometer, thermal source

SANS AND REFLECTOMETRY

KWS-1: small angle scattering diffractometer, cold source

KWS-2: small angle scattering diffractometer, cold source

KWS-3: very small angle scattering diffractometer, cold source

MARIA: magnetic reflectometer with high incident angle, cold source

NREX: reflectometer with X-ray option, cold source

REFSANS: time-of-flight reflectometer, cold source

SANS-1: small angle scattering diffractometer, cold source

SPECTROSCOPY:

DNS: diffuse scattering spectrometer, cold source

J-NSE: spin-echo spectrometer, cold source

PANDA: three-axes spectrometer, cold source

PUMA: three-axes spectrometer, thermal source

RESEDA: resonance spin-echo spectrometer, cold source

SPHERES: backscattering spectrometer, cold source

TOFTOF: time-of-flight spectrometer, cold source

TRISP: three-axes spin-echo spectrometer, thermal source

IMAGING AND ANALYSIS:

ANTARES: radiography and tomography, cold source

NAA: neutron activation analysis

NECTAR: radiography and tomography, fission neutron source

PGAA: prompt gamma-activation analysis

POSITRONS:

NEPOMUC:

- positron beam ("open beam port")
- positron defect spectrometer ("Coincidence doppler broadening")
- positron life time spectroscopy ("PLEPS")

Details of these instruments can be found at

mlz-garching.de/instruments

Details of the available sample environments can be found at

mlz-garching.de/se

THIN FILM LABORATORY

Access to the thin film laboratory for the sample preparation via a MBE system is offered ONLY in combination with successful proposals submitted to the reflectometers MARIA and N-REX. Users can apply for remote access (the sample is fabricated by staff scientists without the user), or collaborative access (the user fabricates the sample under the supervision of staff scientists). In order to apply for access to the thin film lab, please download the additional thin film lab proposal template from

mlz-garching.de/englisch/user-office/downloads-und-tools
complete it with details of the sample to be prepared and email it to useroffice@mlz-garching.de.

The users are warmly invited to contact the scientist in charge (Dr. Sabine Puetter; s.puetter@fz-juelich.de) before submitting a combined proposal for accessing the thin film laboratory. Please find further information at mlz-garching.de/mbe

TRANSMISSION ELECTRON MICROSCOPY

Access to the Transmission Electron Microscopy is offered for soft matter investigations ONLY in combination with successful proposals submitted to any MLZ instrument. Users can apply for remote access (the sample is observed by staff scientists without the user), or collaborative access (the user observes the sample under the supervision of staff scientists). In order to apply for access to the Transmission Electron Microscopy, please download the additional TEM proposal template from

mlz-garching.de/englisch/user-office/downloads-und-tools
complete it with details of the sample to be observed and email it to useroffice@mlz-garching.de.

The users are warmly invited to contact the scientist in charge (Dr. Marie-Sousai Appavou; m.s.appavou@fz-juelich.de) before submitting a combined proposal for accessing the Transmission Electron Microscopy. Please find further information at mlz-garching.de/tem

IRRADIATION FACILITIES

In addition to beam tube experiments, irradiation facilities are available for neutron activation analysis, isotope production and silicon doping. Please contact the User Office (useroffice@mlz-garching.de) for further information.

Rapid Access Programme

A Rapid Access programme is also available at the MLZ, please check the programme details at

mlz-garching.de/englisch/user-office/getting-beam-time

Combined Neutron/ Photon Proposals at GEMS

GEMS offers the possibility of combined neutron/photon beam time proposals: The use of the neutron instruments **REFSANS**, **SANS-1** and **STRESS-SPEC** at the MLZ can be combined with the following photon instruments at the HZG outstation at DESY at the synchrotron source PETRA III:

- **HEMS**: diffraction and imaging at high energies
- **IBL**: micro- and nanotomography
- **BioSAXS**: Small-Angle X-ray Scattering Beamline
- **Nanofocus Endstation** at the The Micro- and Nanofocus X-ray Scattering Beamline (nanodiffraction)

If you submitted a proposal for beamtime at one of the above mentioned instruments to the DESY-DOOR system please use the same proposal title and add the corresponding DOOR proposal number in the MLZ proposal. If you are interested in submitting a proposal for beamtime at the BioSAXS instrument please contact the GEMS instrument responsible Vasyi Haramus (vasyl.haramus@hzg.de).

More information is available on our website
gems.hzg.de

For these proposals GEMS scientists will coordinate the two beamtimes.

Don't forget!

Experimental Reports

Please note that it is mandatory to submit an experimental report for any experiment performed not later than two months after the end of the experiment.

The absence of mandatory experimental reports will be checked for experiments performed after **January 01st, 2018**, and will influence the overall evaluation of your proposal, we warmly suggest all the users not to neglect this step.

Only experimental reports submitted to the online system by **April 09th, 2020** at the latest will be considered for the review process.

Please note!

Due to the step by step switch to the new User Office Online System GhOST, experimental reports have still to be submitted via the “old” User Office Online Systems:

- user.frm2.tum.de for instruments supported by **TUM, Helmholtz-Zentrum Geesthacht, and MPG**
- fzj.frm2.tum.de for instruments supported by **Forschungszentrum Jülich**
